

PROCESS CONTROL SEQUENCE TIMERS

Series : ST 2061 / 2011

Jayashree Electron Pvt. Ltd., a trusted name in industrial automation since 1982, presents the **Sequence Timer ST 2011/2061**, a micro controller-based programmable sequence controller timer system engineered to automatic control of process control operation.

Key Features :

- **Available from 5 to 500 Channels** with programmable group/section selection for flexible configuration.
- **Relay Output/Solid State Outputs** to drive external solenoid valves, ensuring efficient control.
- **Digital/IOT LED Display** for clear and intuitive status monitoring.
- **M.S/ABS Enclosure** with protection grades ranging from **IP30 to IP65**, offering durability and versatility in various environments.

Backed by decades of experience and a commitment to industrial excellence, Jayashree's Sequence Timer ensures **consistent operation**, **improved efficiency**, and **maximum machine coordination**.
